

two lots facing the ocean in almost the center of them and the garage is built on the lot in the rear. The lots are 50 x 100.

Q That would be a frontage of about--

A Frontage of 100 feet; our property has 100 feet frontage and 150 deep.

Q Now, where did you usually fish with respect to your own property?

A I was fishing that evening right almost directly in front of the house, we will say it was right in front of the house, we will say just like that, pretty close to the boardwalk and if the tide was high I would be right up close to the boardwalk; if it was low I would be down on the ocean front a little bit more.

MR. STUDER: Give it the letter "S" to indicate yourself. S for Stevens.

Q Is that the place you usually fished from?

A I fished there more than any other place. Sometimes I would move up a block or two that way, and sometimes a block or two further, but usually I did my fishing right close to the house, because it was handy.

Q Now, will you briefly give us an idea of the other properties or houses located in your immediate vicinity?
